Portable Evaporative Cooler 750W

1035T

240V/50Hz/750W 3 speed motor
Max. air flow: 23,000 m3 per hour
Effective cooling area: 150-200sqm
Water usage: 12-18 litres per hour
Water tank capacity: 130 Litres
1730H x 1120W x 680Dmm
Weight: 63kg

Remote Control Timer Panel

FEATURES & BENEFITS

Moulded polyethylene housing will not crack and is rust & leak proof.
Environmentally-friendly alternative to traditional reverse cycle A/C.
Cools without chemicals or refrigerants.
Long-term dependability.
Near maintenance free operation.
Cools where traditional cooling methods are impractical or cost-prohibitive.
Remote control speed adjustment.
Direct drive. LCD 24 hour timer panel.
Easy to read water level sight tube gauge.
Dual pour in refill water inlet and/or 3/4" hose fitting for automatic tap refill.
Adjustable water flow & drain valve.
Nylon castors for easy portability.

TRADEQUIP INDUSTRIAL AIR CONDITIONERS FEATURES & BENEFITS

Compact yet powerful. Wide operating range of 18° - 45°C.
 Single duct system for easy installation. Capillary tube construction for simplicity.
 5 Litre self-contained condensation tank for easy removal and emptying.
 Heavy duty compressor with automatic restart and short cycle protection.
 Motors and compressors have overload protection.
 Durable and long lasting steel construction.
 Heavy duty locking castors and handles for easy manoeuvrability.
 Easy to use plug in and place the hot air duct out of window/door or into false ceiling.

TRANSMISSION
LIFTER SHOWN
IN IMAGES SOLD
SEPARATELY

Excludes GST
\$399
Inc. GST \$438.90

FEATURES

The saddle frame is constructed of superior-grade steel and built to premium standards for professional quality and durability.

The enlarged threaded rods paired with cantilevered handles allow for faster adjustments over standard saddle design resulting in higher efficiencies.

The four ratcheting securing pins are easily and quickly adjustable making transmission lifting safer & more secure.

Two tie-down straps included to safely secure the transmission to the saddle. Four rounded tie-down points and holes in securing pins allow for added level of customisation to secure the load.

One removable saddle pin allows for accommodation of longer gearboxes. Compatible with and for use on selected TQB Brands Transmission Lifters Only.

Underhoist Auxiliary Stand 680KG

1198T **TRADEQUIP**

FEATURES OF TQ Pro BOTTLE JACKS

Using CNC technology, **TQ Pro** products are constructed using superior-grade steel and built to premium **TQ Pro** standards for professional quality and durability. Premium quality large diameter hydraulic steel cylinders are machined with precision tolerances, then treated and polished to minimise wear and extend service life. Incorporating the latest technology in aggressive wiper seals and OD exclusion, the high capability premium quality seal systems efficiently protect internal hydraulics keeping it free from dirt, mud, water, and other contaminants. A lead-free paint finish is applied after a thorough chemical wash to ensure a long-lasting premium finish with a final coat that is oil, grease and dirt-resistant for easy cleanup.

MORE THAN JUST A PRESS!

Workshop Mate Workstation featuring a 30,000KG Shop Press & Spring Compressor

WSM4  THE MECHANICS WORKSTATION

Safe working capacity: 30,000kg
Working range: 224mm-819mm
Piston ram stroke main ram:
140mm (Standard load cap fitted)
Bed height settings: 85mm increments-8 settings
Bed width: 466mm Bed gap: 200mm
Spring compressor: Piston ram stroke: 295mm
Operating air pressure: 90-125psi
Overall dimensions: 1820H x 1170W x 820Dmm
Weight: 400kg

**MADE FOR THE
TRADE**

FEATURES

AIR/HYDRAULIC OPERATED 30,000KG PRESS
SPRING COMPRESSOR.
FILTER CRUSHING ACCESSORY
DOZENS OF UNIQUE TOOLING OPTIONS
ON-BOARD TOOLING STORAGE STAND
WINCH OPERATION TO LOWER AND RAISE BENCH

BENEFITS

Press almost any bearing or bush with **PRECISION** and **ACCURACY** in minutes, saving valuable workshop time.

Smooth **AIR/HYDRAULIC** foot pedal operation for hands-free accuracy & control.

Hands free Spring Compression.

Even the most difficult pressing tasks become **SAFE & EASY**.

Complete with **COMPREHENSIVE HIGH QUALITY** Interlocking Tool, Die and Spacer Kit to ensure **SAFE WORK PRACTICES**.

Complete on machine storage - minimises time spent searching for the required tools & spacers for each job!

Tasks like **SUSPENSION BUSHES** once seen as too hard become a breeze.

A comprehensive variety of spring adaptors, suitable to almost any type or model of spring **SAFE & EASY** to compress in minutes.

Decrease labour time & increase productivity and efficiencies.

INCREASE WORKPLACE SAFETY.

Undertake jobs that are currently too difficult.

FEATURES

- Heavy-duty H-frame constructed of high-grade steel and built to exacting standards for quality and durability.
- Foot operated air trigger ram travel control. • 100mm pressure gauge. • Extra tall working range for versatility. • Pair of bed plates included
- Table winch system lowers or raises the bed. • Integrated overload protection valve keeps from overloading the system.
- High quality large diameter hydraulic steel cylinder unit results in lower oil pressure needed to raise the load, helping to reduce wear and extend service life.
- Piston-ram is treated and polished and fitted with backup ring, preventing load from falling slowly or bypassing oil drift.
- Hydraulics are powered with a high quality oil, which offers better corrosion resistance & high/low temperature flexibility, allowing the unit to operate at temperatures.
- Lead-free paint finish is applied after a thorough chemical wash to ensure a long-lasting finish to help prevent rust & is oil, grease, & dirt-resistant for easy clean up.

Blasting Cabinet 420 Litre Capacity

3036T **TRADEQUIP**
The trusted brand in equipment

Cabinet capacity: 420 Litre
Air regulator & gauge panel
4 Ceramic nozzles: 2x5mm, 2x6mm
Maximum media capacity: 70kg
Maximum air pressure: 125psi
Required air supply: 15-25CFM
14 gauge steel legs & 16 gauge panels
Sand blasting efficiency: 100cm²/min
Optimum operating pressure 60-110psi
External size: 1680H x 1180W x 940Dmm

Includes blasting gun and vinyl blaster gloves

Oversized hinged top door opening
Includes 240V dust extraction system

420 LITRE Capacity

BLASTING MEDIA ABRASIVE

Tradequip "Made for the Trade" Blasting Media Abrasives are designed for use in conjunction with our Tradequip Mobile Blasting Kits and Blasting Cabinets. Abrasive blasting has been used for many years to clean and remove rust, paint and corrosion. There are many types of abrasive media available, the most common being Garnet, Steel Grit and Glass Bead. These media have an aggressive cut and can rapidly remove paint and rust. However, they can also generate significant heat, potentially resulting in warped metal and etched surfaces, and they cannot be used on fiberglass. Also, chrome, plastic, rubber, trim, and other parts must be removed from a work surface or masked-off before blasting. Alternatively, less-aggressive media, such as Walnut Shell, will do a great job at removing paint. Walnut Shell does not generate as much heat as other media, and can be used on sheet metal and fiberglass without damaging the base material. However, Walnut Shell as with any abrasive media, will require more clean-up as it leaves particles in the car body's seams and crevices that can be difficult to completely remove. Soda blasting media has non abrasive properties which makes it a very universal blasting media which can be applied to lighter materials such as aluminium, plastic, fibreglass, wood etc. Soda Blasting does not damage glass, rubber, chrome items if they are left on a vehicle for blasting.

GARNET 25KG MEDIUM 30/60

3020T **TRADEQUIP**
The trusted brand in equipment

Garnet is a gemstone with excellent naturally abrasive properties. This hard abrasive is fast-cutting, low-dust producing and low-consuming, excellent for removing tough coatings, paint, rust and mill scale from steel. Garnet also permits precise feathering control. A good general outdoor surface preparation abrasive.

Excludes GST

\$62

Inc. GST \$68.20

WALNUT SHELLS 20KG 6-100 MICRON

3022T **TRADEQUIP**
The trusted brand in equipment

Walnut Nut shells and other organic materials, don't cause anchor patterns, making them useful for removing dirt, grease, oil, carbon, scale, burrs and paint without changing the underlying substrate. Walnut shells can be an excellent choice for softer surfaces such as wood — they won't cause etching. Walnut shells are one of less abrasive blasting media you can use and are completely biodegradable, making them among the most environmentally-friendly blasting media.

GLASS BEAD 25KG 106-300MICRON

3025T **TRADEQUIP**
The trusted brand in equipment

Glass beads are used for general cleaning, peening and cosmetic finishing of sensitive metal surfaces; removing automotive paint; brightening grout and removing fungus and calcium deposits from tile; polishing cast iron, stainless steel, aluminium, propellers and turbine blades. Glass Beads are environmentally friendly and can be used in many blast applications to provide a finish with no profile. Use while working with metal, plastic or rubber materials to clean, debur and finish.

Excludes GST

Capacity: 95 Litres
Minimum height: 270mm
Size: 1120L x 750W x 270Hmm

FEATURES

Enamelled steel construction.
Oil and coolant resistant.
Removable metal screen.
Four swivel wheels, two which are braked.
Handle can be mounted to front or side.
Drain valve & Grab handle.

Handle can also be mounted here

ABOUT EAGLE PRO HYDRAULICS

With nearly 3 decades experience of manufacturing hydraulic tools for industrial applications, Eagle Pro Hydraulics has become the trusted partners for applications spanning from offshore plant maintenance to mining, infrastructure, commercial and industrial. Eagle Pro Hydraulics are manufactured to ISO 9001:2018 through international quality assurance programs which involve consistent observation of administration, management, manufacturing and production control. Eagle Pro hydraulic cylinders meet or exceed ANSI B30.1. This results in reliable and dependable high-quality products you can count on every time.

ES SERIES

Single Acting General Purpose

Eagle Pro ES series redefines durability for the harshest of industrial environments with its high strength alloy steel construction. Hardened and chromed piston ensures superior product life by reducing wear and corrosion. Eagle Pro ES series is not only durable, it gets the job done! Heavy-duty, straight pull return springs provide fast retraction. For greater flexibility and easy mounting, the ES series comes with collar, multiple piston threads, and base mounting holes. Hardened and E-coated snap-in type saddle prevents piston jamming and mushrooming, practically eliminating downtime. The female coupler comes with a dust cover - preventing dirt and debris from entering the hydraulic system. The Eagle Pro ES series also complies with ASME B30.1 standard.

EDH SERIES

Double Acting Hydraulic

The Eagle Pro EDH series incorporates a hollow piston design that allows both pushing and pulling forces. The construction of high strength alloy steel maximizes durability. The EDH series' double acting operation ensures fast and controlled piston reaction time. Accidental over-pressurization is prevented with a built-in safety valve. The collar, piston threads, and base mounting holes enable easy fixturing.

ED SERIES

Double Acting General Purpose

The Eagle Pro ED series produces fast and controlled piston contraction thanks to the double acting operation. A built-in safety valve prevents accidental-over pressurization. Most models include collar, piston threads, and base mounting holes to make fixturing a simple task. Piston jamming and mushrooming is prevented by the cylinder's hardened, and E-coated snap-in saddle. The ED series enhances durability with a hardened and chromed piston that reduces wear and corrosion. ED series cylinders are easy to move around the job site with the addition of carrying handles (and eyebolts on larger models) that ease positioning and carrying. A durable, anti-corrosive finish is added using an environmentally friendly coating process.

EDX SERIES

Double Acting High Tonnage

Eagle Pro EDX series maximizes durability with the use of a high strength alloy steel. The built-in safety valve prevents accidental over-pressurization. The EDX is easy to carry and position with the included eyebolts. Optional tilt saddles are also available. The hardened and chromed piston minimizes wear and corrosion damage. The incorporation of base mounting holes enables easy fixturing. An environmentally friendly coating process provides a highly durable finish.

EL SERIES

Single Acting With Locking Collars

The Eagle Pro EL series includes an alloy steel lock nut for mechanical load holding. The EL series is constructed of a high strength alloy steel to maximize durability. The hardened chrome piston reduces damage caused from wear and corrosion. The over flow port functions as a stroke limiter. The EL series includes hardened grooved replaceable saddles. Composite bearings prevent metal-to-metal contact. Quick reaction times are obtained through with heavy-duty straight pull return springs. An environmentally friendly coating process produces a finish that further increases durability.

ESL SERIES

Low Profile And Pancake Style

Featuring a low-profile, or flat design, the Eagle Pro ESL series cylinder is an optimal choice for confined spaces. The hardened and chromed piston is constructed of high strength alloy steel that increases durability by reducing wear and corrosion. The grooved piston end does not require a saddle and the inclusion of mounting holes permits easy fixturing. Retraction time is quick thanks to the heavy duty, straight pull return springs. An environmentally friendly coating process is used to provide the durable anti-corrosion finish.

ESH SERIES

Single Acting Hollow Piston

The Eagle Pro ESH Series allows for both pushing and pulling by incorporating a hollow piston design. The heavy-duty return spring provides notoriously quick reaction times. Easy fixturing with the inclusion of collar threads.

EPA SERIES

Dual Speed Hand Pumps

The Eagle Pro EPA series hydraulic hand pumps are some of the most durable, powerful and reliable hand pumps in the industry today. The EPA series feature valve blocks that are machined from a single piece of high strength aircraft grade aluminum and high capacity reservoirs made from alloy steel* that maximizes durability. The EPA series hand pumps are compact and easy to carry around the job site. To get the job done faster, these powerful dual speed pumps offer some of the best flow rates in the industry. All of the EPA series hydraulic hand pumps feature an internal safety valve to prevent system damage.

PORTABLE EVAPORATIVE COOLING

**FIND OUT MORE ABOUT
TQB BRANDS LATEST
OFFERING HERE....**

These **eQuipt Portable Evaporative Cooling** units are specifically designed for smaller workspaces, offering an impressive air flow capacity. These user-friendly units feature a robust, weather resistant molded polyethylene housing that is both crack- and leak-resistant.

Equipped with a three-speed fan, these coolers efficiently circulate warm air over rigid, water saturated evaporative cooling media, resulting in a notable reduction in ambient temperatures of up to 10°C.

The adjustable swing louvre feature allows for customizable directional air flow, enabling users to tailor the cooled air output to their preferences.

eQuipt
COOLING

Portable Evaporative Cooler 150W

E11-0010

240V/50Hz/150W 3 speed motor
Max. air flow: 6,000 m³ per hour
Water consumption: 4-5 litres per hour
Effective cooling area: 45-55sqm
Water tank capacity: 45 Litres
Dimensions: 1185H x 650W x 430Dmm
Weight: 17kg

eQuipt
COOLING

Portable Evaporative Cooler 200W

E11-0020

240V/50Hz/200W 3 speed motor
Max. air flow: 9,000 m³ per hour
Water consumption: 5-6 litres per hour
Effective cooling area: 60-70sqm
Water tank capacity: 70 Litres
Dimensions: 1360H x 820W x 545Dmm
Weight: 35kg

eQuipt
COOLING

Portable Evaporative Cooler 450W

E11-0030

240V/50Hz/450W 3 speed motor
Max. air flow: 12,000 m³ per hour
Water consumption: 8-10 litres per hour
Effective cooling area: 70-90sqm
Water tank capacity: 60 Litres
Dimensions: 1430H x 900W x 560Dmm
Weight: 45kg
